

## For Large Capacity Melting Pot

### -HIGH Capacity Ingot Feeder for Large Capacity Melting Pot

- Offers long production runs with stable bath levels and temperatures.
- Double ingot feeding system attached to a rotating pole.
- Electrical chain block to bring both (2) ingot feeders to an acceptable height in order to service the loading devices.
- Fully automatic with a maximum load of 260 Lbs / 118 Kg of Zamak or Aluminum ingots.
- Can be configured with multiple pliers or hooks.
- Control unit offers low or high liquid levels detection alarms to notify the operators.
- Loading the ingots is done away from the melt zone for enhanced safety.
- Holds up to 12 to 16 ingots depending on the size.
- Reduces manipulation in order to free up operators for other tasks.
- Preheats ingot slowly while waiting for feeding.
